

Hybrid Energy Saver (HES) System

HES delivers up to 70% energy reduction
Save money • Take control • Minimise energy use

- Reduces pump noise
- 100% performance guarantee
- Reduces your carbon footprint
- Improves filtration and water quality
- Reduces power costs by 30 - 70%
- 100% money back guarantee*

The Hybrid Energy Saver (HES) System is specifically programmed to your swimming pool to achieve maximum energy efficiency and water quality.

HES reduces power consumption used by pool pumping systems using a combination of exclusive IP and technical applications which suit all types of domestic pool pumps. HES units are also available for pool heating and solar pump applications.

HES units are only available from MinPower Domestic and authorised agents.
